'07: \$2,930,000

Sales '07: 1.630%

Projected '08: 0%

Est.: 1990

Employees: 30

**Custom cabinetry**

The 2007 purchases of a nested-based router, material handling equipment and Microvellum software helped California Woodworking increase productivity, improve quality and earn its spot on the WOOD 100. Luke Vickery, vice president, says the "use of automated equipment has decreased the number of mistakes made, while the use of material handling equipment has lessened the amount of damaged components and handling labor typically performed."
